## How to Install

1. Download an extension from your personal account.
2. Backup your website database and web directory.
3. Unzip the extension folder locally.
4. Copy all folders and paste them into your Magento root folder. This will not overwrite any existing files, just add new files into the folder structure.
5. Login into your Magento Backend / Admin panel.
6. Go to System >> Cache Management. Select all cache type and click on Flush Magento Cache and same process for Flush Cache Storage.
7. Navigate to System/Configuration, if you can see the extension tab, it is installed properly.
8. Once you clicking on the extension tab if you got an error of access denied then you need to logout admin panel and login again.
9. Go to frontend and try to process, make sure that everything is OK.

## How To Use?

1. Goto Catalog >> Manage Categories. You will see a category named Product Deals created. Copy the ID of the category.
2. Go to : System >> Configuration >> Vsourz Deals >> Product Deals and follow below steps

### **\*\*\* General Setting**

- Load JQuery Library: Select YES if JQuery library in not included in your Magento Project
- Load OwlCarousel JS/CSS: If you have already included OwlCarousal then select "No" otherwise "Yes"
- Category Id: Insert the category Id of the product deals category. Please Note: This is a default category id. To list the products of particular category, you can override the default id from the code snippet given below.
- Product Per Row: Enter number of products you want to show in single row. Supports upto fours products per row

3. Enter the Special Price, its Start date and End date to list the product in Deals section automatically

The screenshot shows a 'Prices' management interface. At the top right, there is a '+ Create New Attribute' button. The main form contains the following fields:

- Price \***: Input field with value '17.00' and '[USD]' below it.
- Group Price**: A table with columns 'Customer Group', 'Price', and 'Action'. Below the table is an 'Add Group Price' button.
- Special Price**: Input field with value '15.00' and '[USD]' below it.
- Special Price From Date**: Input field with value '27/05/2015' and a calendar icon.
- Special Price To Date**: Input field with value '16/10/2078' and a calendar icon.

## How to call the deal section on frontend?

### \*\*\*\* Shortcode \*\*\*\*

You can use below code snippet to display deals products on frontend. Any number of categorised deals can be created on website.

1. Use `product_count` to display limited number of products in this section **product\_count = 0** will display all products in that category
2. To create separate deals based on the category, you will have to mention the category id in the code snippet while calling it. Use parameter **category\_id = "CAT ID"**

## Deals Slide Layout :

### Admin :

```
{{block type="vsourz_deals/deals" name="deals-products" template="vsourz/deals/deals-slider.phtml" title="Hot Deals"}}
```

### XML :

```
<block type="vsourz_deals/deals" name="deals-products" template="vsourz/deals/deals-slider.phtml">  
<action method="setTitle">  
<title>Deals List</title>
```

```
</action>
<action method="setCategoryId">
<category_id>60</category_id>
</action>
</block>
```

#### **PHTML :**

```
<?php echo $this->getLayout()->createBlock('vsourz_deals/deals')->setCategoryId('1')->setTitle('Hot Deals')->setTemplate('vsourz/deals/deals.phtml')->toHtml(); ?>
```

#### **Deals List Layout :**

##### **Admin :**

```
{{block type="vsourz_deals/deals" name="deals-products" template="vsourz/deals/deals.phtml" title="Hot Deals List"}}
```

##### **XML :**

```
<block type="vsourz_deals/deals" name="deals-products" template="vsourz/deals/deals.phtml">
<action method="setTitle"><title>Deals List</title></action>
<action method="setCategoryId"><category_id>60</category_id></action>
</block>
```

##### **PHTML :**

```
<?php echo $this->getLayout()->createBlock('vsourz_deals/deals')->setCategoryId('1')->setTitle('Hot Deals')->setTemplate('vsourz/deals/deals.phtml')->toHtml(); ?>
```
