

MASONRY RESPONSIVE IMAGE GALLERY

For Magento 1

Overview

Create an exquisite Image gallery with Masonry effect, Magnific pop-up and Responsive layout. Our extension allows you to create multiple image galleries with a facility to display your gallery wherever you want on your website.

Simple 10 minute setup, and your image gallery is ready to wow your customers. Follow these steps to have it setup instantly:

1. Download and install the extension
2. Create a category, enter category description and category image
3. Add more Images under category
4. Add the code snippet given below to invoke this beautiful image gallery

You can learn more about Adding Category and Images from **How to add categories and Images?** section.

Demo Link: <http://extensiondemo.vsourz.co/gallery.html>

Features

1. Unlimited Image gallery creation
2. Ability to show category banner and description along with Image gallery
3. Magnific pop-up
4. Masonry effect
5. Iterative hover effect
6. Facility to add image title and description
7. Image Sorting
8. Smooth pop up navigation
9. Responsive layout

How to Install

1. Download an extension from your personal account.
2. Backup your website database and web directory.
3. Unzip the extension folder locally.

4. Copy all folders and paste them into your Magento root folder. This will not overwrite any existing files, just add new files into the folder structure.
5. Login into your Magento Backend / Admin panel.
6. Go to System >> Cache Management. Select all cache type and click on Flush Magento Cache and same process for Flush Cache Storage.
7. Navigate to System/Configuration, if you can see the extension tab, it is installed properly.
8. Once you clicking on the extension tab if you got an error of access denied then you need to logout admin panel and login again.
9. Go to frontend and try to process, make sure that everything is OK.
