DPD UK Integration
Magento 2

OVERVIEW

DPD UK Magento 2 extension will facilitate your parcel delivery for the UK or elsewhere in the world, thus satisfying all your consignment distribution requirements. The extension will provide various services such as express, parcel and freight. These DPD UK services are integrated in our extension with the help of which admin will be able to generate shipment.

FEATURES

- Enhancements features like SMS and Email notifications.
- Manage partial shipment functionality with DPD UK extension.
- Shipment can be tracked from Magento backend.
- Logged In user and guest user will be able to track their parcel on Magento website as well as on DPD UK site.

This document contains guidance about DPD UK integration installation and its features in Magento 2.

Services	Description
BY 10:30	Selecting this service will deliver your parcel at the start of your working day, used in urgent parcel delivery.
NEXT DAY	Select this for parcel delivery before close of business the following working day.
SATURDAY SERVICE	This option is for extending the working week - SATURDAY 10:30, SATURDAY 12:00, SATURDAY NEXT DAY.
BY 12:00	This will help you in receiving urgent parcel delivery before noon the following working day.
SUNDAY SERVICE	This service is available for 7 days a week - SUNDAY 12:00, SUNDAY NEXT DAY.

HIGHLIGHTS

1. In Magento backend, the extension gives provision to set up account details that will connect DPD UK with Magento.
2. Track your parcel with "Follow My Parcel" option, after 15 minutes of the order shipment.
3. Get flexible delivery by setting your own parcel collection date from backend.
4. Notify customer at every step via SMS or Email about the parcel.
5. Tracking number details can be accessed from Magento shipment detail page.

How to Install extension using COMMAND LINE?

1. Download the Dpd UK extension.

2. Unzip the file in a temporary directory/folder with name as Dpd.

3. Put Dpd directory as per this folder structure:

   project_root/app/code/Magenticity/Dpd

   - php bin/magento setup:upgrade
   - php bin/magento setup:di:compile
   - php bin/magento setup:static-content:deploy

After running the commands, you have to log into the admin panel and you have to clear the Cache from System >> Cache Management

HOW TO USE?

- Login to Magento Admin Panel.

- Go to Stores > Configuration > Magenticity > DPD Integration.

Enable:
This option will have 2 values i.e. **Yes/No**. To enable the extension on Magento you need to select Yes else No for disabling.

Sandbox:
Set sandbox mode **Yes** when you use test credentials. Choose sandbox mode **No** when you go live.

Username & Password:
You need to enter your DPD UK account username and password.

Account Name & number:
You can get your account name and number from your DPD UK account.

Liability Required:
This field contains 2 options i.e. Yes/No.
In any condition if the consignment is lost or damaged then the compensation to be offered is explained at link below:

https://www.dpd.co.uk/terms-and-conditions.jsp#10

Refer section - **LIMITATION AND EXCLUSION OF LIABILITY** at above link.
